I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward Ltd.'s Guiding Principles and that Rowland Ward can use my photos for publication.

Signature _____ (Official Use Only ____/____/____)

Method 1-f

Deer with 3x3 or 4x4 Typical Frames: Axis or Chital, Bawean, Calamian, Chinese roe, Hog, Rusa, Sambar, Sika, Siberian roe, and Visayan

Length: Measure the main beam antler on the center of the outside curve from the lowest edge of the burr to the tip. **(L)** The tape must not be pressed into the groove above the burr.

Circumference: Measure circumference at the burr. **(C)** Measure the smallest point **(C1)** between the brow and bez **(T1 and T2)**. Measurement must be taken between typical tines.

Typical Tines: Measure the length of all typical tines of 1 inch or more. **(T1, T2) and T3 for sika only.** Mark off all tines with a base line. Measure from the point of the tine to the center of the base line. All deer for this method have 3 typical points per side with the exception of a sika, which can have a 3x4, 4x3 and 4x4 as a typical frame. Measure only typical tines on a 3x3 or 4x4 frame, non-typical tines see below.

Spread: Measure from the farthest tine or main beam on the left side to the farthest tine or main beam on the right side and measure at an exact 90-degree angle to the center line of the skull. Do not measure any NT tines that protrude on the outside of a rack that would increase the spread value, see figure 2. **(G)**

The sum of the above is the score for a typical trophy, but any non-typical tines must be recorded. See below.

Nontypical Tines: Measure the length all nontypical tines of 1 inch or more. Measure from the point of the tine to the center of the base line. **(NT1, NT2, NT3, etc.)** Non-typical tines do not count towards the total score but are shown as supplemental information.

Nontypical Tines for Siberian and Chinese roe: For these two roe deer if the total non-typical score **(D)** is 3% or more than the typical score **(C)** the head falls in the NT category.

Count the number of typical tines.

Count the number of non-typical tines.

Comments (Note trophy repairs, remeasuring, and so on, here):
