Length: Begin on the front of the horn at the lowest point and follow the center front over the horn to the tip. (Figure 1, **L**) If horn tip worn or broken Card off (see general instructions) (Figure 3)

Circumference: Measure the base. (**C**) The tape must form a continuous loop and be at a 90-degree angle to axis to the horn. (Figure 2) Do not press the tape in any groove and do not follow the jagged edge at end of the horn. **Next**, divide the length of the longer horn by three. Use that number to section the horn into quarters. Use the same number to section the shorter horn into quarters. Measure the circumference of the 1st, 2nd, 3rd quarters. (**C1, C2, C3**) These measurements are to be made at a 90 degree angle to the axis of the horn.
