To Be Filled Out by Measurer: (All fields **MUST** be filled in for entry to be acceptable.) (Please print!)

Date Measured _____/_____/_____
(year/month/day)

Measurer's Information:

Name _____ Signature _____

Trophy Information: Country _____ Date Collected _____/_____/_____
(year/month/day)

Area/Nearest town _____ Enclosed area: Yes No

Rifle/Shotgun | Muzzleloader | Handgun | Bow/Crossbow | Picked up | Acquired | If enclosed, _____ Acres Hectares

Owner's/Hunter's Information: (For different shipping address, see other side)

First _____ Last _____

Address _____

City _____ Prov / State _____ Pstl Code _____ Country _____

Tel. (INT) (_____) _____ Email _____

Credit Card: Visa MC AMX (Credit card payments will be processed through Safari Press, Inc.)

Credit Card Number _____ Expires _____/_____/_____ CVV _____ (on back of card)

I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward Ltd.'s Guiding Principles and that Rowland Ward can use my photos for publication.

Signature _____ (Official Use Only _____/_____/_____)

Method 8

African Spiral-horned Antelopes (Giant Eland, common Eland, Bongo, Sitatunga, Bushbuck, Southern Nyala, Mountain Nyala, Greater Kudu, Lesser Kudu) plus Addax and Blackbuck.

Length: Measure around the spiral, keeping the tape on top of the spiral ridge. Start at the base, find the lowest point of the front ridge, and proceed to the tip. When spiral ridge ends, proceed in straight line to tip; do not continue to spiral. **(L)**

Circumference: Measure the circumference at a 90 degree angle to the axis of the horn. **(C)** Elands and greater kudus have hard-to-measure bases, so take care **(1)** to ensure continuous loop with tape, **(2)** to not depress tape into valleys or deep grooves, and **(3)** to not weave the tape along the edge of the base.

Addax and Blackbuck: Start the length measurement at the base of the horn on the center front of the horn. Follow the grain around the spiral of the horn, this is harder with blackbuck because the density of the ribs distorts the grain in some sections and takes some care. Use a cable and mark a path first with a pencil. An extra pair of hands is helpful with these animals.

Correct way to measure the base at a 90-degree angle to axis of the horn

Wrong way to measure

Comments (Note trophy repairs, remeasuring, and so on, here):
