Signature _____ (Official Use Only ____/____)

Method 7-a

Reedbucks use Method 7-a. Do not measure/record the circumference of the bases. Measure length without including the "green" or soft/pulp material. Record all duiker, dik-dik, rhebok and dwarf antelope in fractions of 1/16.

Length: Measure in the center of the front curve from the lowest edge of the base to the tip. **(L)** Do not press the tape into any ribs or depressions. Stay on the front of the horns and do not slide off to the outer side.

Circumference: Measure the circumference of the base of each horn at a 90-degree angle to the axis of the horn whilst staying on or over horn material at all times. **(C)**

Comments (Note trophy repairs, remeasuring, and so on, here):
