I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward Ltd.'s Guiding Principles and that Rowland Ward can use my photos for publication.

Signature _____ (Official Use Only ____/____)

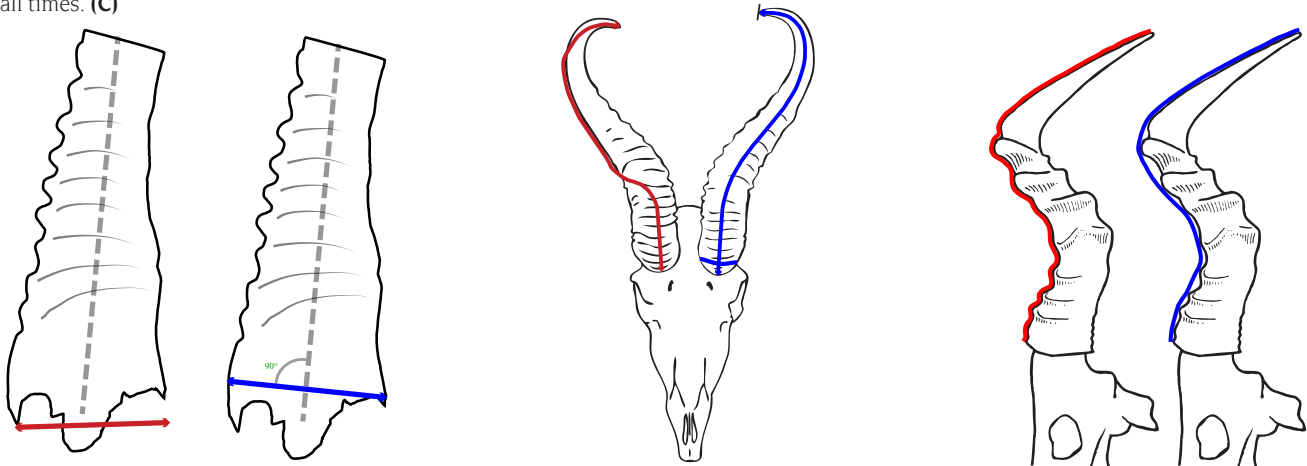

Method 7-a

Reedbucks use Method 7-a. Do not measure/record the circumference of the bases. Measure length without including the "green" or soft/pulp material. Record all duiker, dik-dik, rhebok and dwarf antelope in fractions of 1/16.

Length: Measure in the center of the front curve from the lowest edge of the base to the tip. (L) Do not press the tape into any ribs or depressions. Stay on the front of the horns and do not slide off to the outer side.

Circumference: Measure the circumference of the base of each horn at a 90-degree angle to the axis of the horn whilst staying on or over horn material at all times. (C)

Comments (Note trophy repairs, remeasuring, and so on, here):
