I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward Ltd.'s Guiding Principles and that Rowland Ward can use my photos for publication.

Signature _____ (Official Use Only ____/____/____)

**Method 4-b
Nonpalmated Moose**

Circumference: Measure each main antler beam at the smallest point between the burr and the 1st valid tine. Avoid “pearling” and antler growths. **(C1)**
Tines: Measure the length of each tine over 1 inch (2.5 cm), as long as the base is no wider than its length, along the **underside**. Mark all tines clearly with a pencil where the main beam stops and the tine starts, this is the base line. Start the measurement on the tine end and stop in the center of the base line. Do not measure any palmated material. **(T1, T2, T3, etc.)**
Greatest Spread: Measure the greatest width of the antlers in a straight line at a right angle to the axis of the skull. **(G)**
Score: Moose are ranked on cumulative score of the circumferences, length of all tines and greatest spread.

Comments (Note trophy repairs, remeasuring, and so on, here):
