## Method 5 All Pigs and Hippopotami

**Length:** Measure the length of the two longest tusks on the outside curve from the base to the tip. **(L)** Start the measurement at the base in line with the furthest projection of the tusk's ending. The tip should be carded off if the tape must bend around to reach the tip. (See General Instructions.)

**Circumference:** Measure the circumference of each of the longest tusks at its largest point and at a right angle to the axis of the tusk. **(C)** Typically this is somewhere between the gumline and the halfway point of the tooth. If there are any grooves in the teeth, the tape measure must span the grooves—do not press the tape measure into any depressions.

**Babirusa pigs:** Measure all four tusks in the upper jaw.

Comments (Note trophy repairs, remeasuring, and so on, here):
