To Be Filled Out by Measurer: (All fields **MUST** be filled in for entry to be acceptable.) (Please print!)

Outfitter / Guide _____ Date Measured ____/____/____
(year/month/day)

Measurer's Information:

Name _____ Signature _____

Trophy Information: Country _____ Date Collected ____/____/____
(year/month/day)

Area/Nearest town _____ Game proof fence*: Yes No

Rifle/Shotgun | Muzzleloader | Handgun | Bow/Crossbow | Picked up | Acquired | If enclosed, _____ Acres Hectares

Owner's/Hunter's Information: (For different shipping address, see other side)

*See Measuring Handbook for definition.

First _____ Last _____

Address _____

City _____ Prov / State _____ Pstl Code _____ Country _____

Tel. (INT) (____) _____ Email _____

Credit Card: Visa MC AMX

Credit Card Number _____ Expires ____/____ CVV ____ (on back of card)

I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward's Guiding Principles and that Rowland Ward can use my photos for publication.

Signature _____ Date _____ (Official Use Only ____/____/____)

Method 1-j Muntjac, Brocket and Pudu Deer

N.B. Unlike most other deer species, these animals are measured to the nearest 1/16 of an inch (1.3 cm).

Length: Measure the main beam on the center of the outside curve from the lowest edge of the burr to the tip. **(L)** The tape must not be pressed into the groove above the burr.

Circumference: Measure the circumference of the burr. **(C)**

Typical Tines: All deer for this method have 1 typical tine per side (the main beam) with the exception of the muntjac. Only tines that are found on a typical 1x1 or 2x2 frame of the species may be measured as typical tines. A point is at least 0.5 inch (1.3cm) and no wider at its base than it is long.

Muntjac only (2x2 typical frame): measure the two brow tines or eye guards. A tine must be at least 0.5 inch (1.3 cm) in length to be measured and no wider at its base than it is long.

Total score: is the sum of the above measurements. The measurements below are not part of the score but must be recorded.

Non-typical Tines: Measure the length of all nontypical tines of at least 0.5 inch (1.2 cm). Measure from the point to the base line.

Inside Span: Measure the widest distance between the main beams at a right angle to the long axis of the skull. **(F)**

Count the number of typical tines including the main antler.

Count the number of non-typical tines including the main antler.

Comments (Note trophy repairs, remeasuring, and so on, here):
