Method 14

Wild Sheep (Except Barbary Sheep, Tur, and Bharal. See 7-c.)

Length: Begin on the front of the horn at the lowest point and follow the center front over the horn to the tip. (Figure 1, **L**) If horn tip worn or broken Card off (see general instructions) (Figure 3)

Circumference: Measure the base. (**C**) The tape must form a continuous loop and be at a 90-degree angle to axis to the horn. (Figure 2) Do not press the tape in any groove and do not follow the jagged edge at end of the horn. Next, divide the length of the longer horn by four (4) and record the values in the table under "Quarters Longest Horn". Use these numbers to section both the longest and the shorter horn into quarters starting from the base. Measure the circumference of the 1st, 2nd, 3rd quarters. (**C1, C2, C3**) These measurements are to be made at a 90-degree angle to the axis of the horn. (Figure 2) See tables attached bottom form.

Tip to Tip: Measure the Tip to Tip spread from the center of one horn tip to the other. (**E**) **REQUIRED**

Growth Rings: Count the growth rings on both horns. (Supplemental)
