

Method 1-e

Mule Deer, Sitka Deer and Black-Tailed Deer

Typical	Left	Right	Non-typical	Left	Right
L	/8	/8	NT1	/8	/8
C1	/8	/8	NT2	/8	/8
C2	/8	/8	NT3	/8	/8
C3	/8	/8	NT4	/8	/8
C4	/8	/8	NT5	/8	/8
T1	/8	/8	NT6	/8	/8
T2	/8	/8	NT7	/8	/8
T3	/8	/8	NT8	/8	/8
T4	/8	/8	NT9	/8	/8
Subtotal Typical	/8	/8	Subtotal NT	/8	/8
Total Typical Tines	A	/8	Total NT Tines	D	/8
F	B	/8			
Total Score Typical (A+B)	C	/8	Total Score Non-typical (C + D)	/8	
If D is 3% or more of C trophy falls in Non-typical table.					
Count No. Typical Tines			Count No. NT Tines		

Mule deer
 Sitka deer
 Black-tailed deer

To Be Filled Out by Measurer: (All fields MUST be filled in for entry to be acceptable.) (Please print!)

Outfitter / Guide _____ Date Measured ____/____/____

NOTICE! A minimum of a 60-day drying period is required from the date collected! (year/month/day)

Measurer's Information:

Name _____ Signature _____

Trophy Information: Country _____ Date Collected ____/____/____
(year/month/day)

Area/Nearest town _____ Game proof fence*: Yes No

Rifle/Shotgun | Muzzleloader | Handgun | Bow/Crossbow | Picked up | Acquired | If enclosed, _____ Acres Hectares

Owner's/Hunter's Information: (For different shipping address, see other side)

*See Measuring Handbook for definition.

First _____ Last _____

Address _____

City _____ Prov / State _____ Pstl Code _____ Country _____

Tel. (INT) (____) _____ Email _____

Credit Card: Visa MC AMX

Credit Card Number _____ Expires ____/____/____ CVV ____ (on back of card)

I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward's Guiding Principles and that Rowland Ward can use my photos for publication.

Signature _____ Date _____ (Official Use Only ____/____/____)

Method 1-e Mule Deer, Sitka Deer and Black-Tailed Deer

Length: Measure the main beam antler on the center of the outside curve from the lowest edge of the burr to the tip. **(L)** The tape must not be pressed into the groove above the burr. The main beam is that part of the antler that curves forward and is closest to the skull.

Circumference: Always measure the smallest circumference; **(C1)** between the burr and T1, **(C2)** after the eye guard but before T2 branches off, **(C3)** between the main beam and before the T3 branches off and the **C4** is measured between the T4 and T2. All circumferences are taken between typical tines and not between NT tines.

Typical Tines: All tines must be inch or more, mark all tines with a base line, measure from the point to the center of the base. Start with the 1st tine (eye guard, **T1**) and progress along the main beam **(T2, T3 and T4.)**

Inside Span: Measure the widest distance between the main beams (not any tines) at a right angle to the long axis of the skull. **(F)**
The sum of the above is the score for a typical mule deer, (C on the Method Form), but any non-typical tines must be recorded, see below.

Nontypical Tines: Measure the length of all non-typical tines of 1 inch or more, starting from the burr and working up. **(NT1, NT2, NT3, etc.)** For typical mule deer trophies, they do not count toward the score, but must be recorded. To determine if a mule deer falls in the non-typical category: take the non-typical score (D on the method form) and if it is 3% or more of the typical score (C on the method form) the trophy will be placed in the non-typical category.

- Count the number of typical tines including main antler.
- Count the number of non-typical tines including the main antler.

Comments (Note trophy repairs, remeasuring, and so on, here):
