

## Method 1-a

Rocky Mountain, Roosevelt, and Tule elk.  
Alshansk, Izubr, Siberian and Tian Shan maral

Typical	Left	Right	Nontypical Tines		Left	Right
L (length)			NT1			
C1(circ.)			NT2			
C2(circ.)			NT3			
C3(circ.)			NT4			
C4(circ.)			NT5			
T1(length)			NT6			
T2(length)			NT7			
T3(length)			NT8			
T4(length)			NT9			
T5(length)			NT Tines (B)			
T6(length)			Total Score (A & B)			
T7(length)			No NT Tines			
T8(length)			Supplemental			
F(span)			Weight			Pound/Kilo
Typical Score (A)			Skull Cut			Yes/No
Non Typical Points			See instructions back on typical vs nontypical			

To Be Filled Out by Measurer: (All fields MUST be filled in for entry to be acceptable.) (Please print!)

Outfitter / Guide \_\_\_\_\_ Date Measured \_\_\_\_\_

**NOTICE! A minimum of a 60-day drying period is required from the date Hunted/Found! Days dried**

**Measurer's Information:**

Name \_\_\_\_\_ Signature \_\_\_\_\_

**Trophy Information:** Country \_\_\_\_\_ Date Hunted/Found \_\_\_\_\_

Area/Nearest town \_\_\_\_\_ Game proof fence\*: Yes  No

Rifle/Shotgun  | Muzzleloader  | Handgun  | Bow/Crossbow  | Picked up  | Acquired  | If enclosed, \_\_\_\_\_ Acres  Hectares

**Owner's/Hunter's Information:** (For different shipping address, see other side)

## Method 1-a

### Rocky Mountain, Roosevelt, and Tule Elk, Alshansk, Izubr, Siberian and Tian Shan maral

**Length:** Measure the main antler on the center of the outside curve from the lowest edge of the burr to the tip. (L) The tape must not be pressed into the groove above the burr. The main antler end (tip) is normally the most rearward point.

**Circumference:** Measure the smallest circumference between the **T1** and **T2**, **T2** and **T3**, **T3** and **T4** and finally **T4** and **T5**. (**C1, C2, C3, C4**) Circumferences can only be taken between typical tines.

**Typical Tines:** Mark off all tines along the base. Measure the length of all typical tines of 1 inch or more with a base that is smaller than the tine length. Starting with the brow (**T1**) and work towards the tip. Measure from the point of the tine to the center of the baseline. (**T1, T2, T3, etc.**) Typical tines project from the main antler, forward (**T1**), sideward (**T2, T3**), and upward for the **T4** and beyond. If a tine grows in a different direction, it is not typical. Do not measure (L), the main antler tip, again. Count all typical tines and the main antler points.

**Span:** Measure the widest distance between the center of the main antlers (not any tines) at a 90-degree angle to the long axis of the skull. (**F**) Add all the above and place in Typical Score (A).

**Nontypical Tines:** Measure the length of all nontypical tines of 1 inch or more with a base that is smaller than the tine length. Start with the nontypical tine nearest to the burr and work towards the tip. (**NT1, NT2, NT3**). Nontypical tines grow sideways or backwards from the main antlers and are tines off a tine. Add all NT tines and place in NT Tines (B). Count all nontypical tines.

#### Add (A) and (B) and place in Total Score.

**Rocky Mountain elk:** If the Total Score (B) is 3% greater (or more) than the Typical Score (A) the head will be placed in the nontypical Rocky Mountain elk category. If not, it falls in the typical category.

**Roosevelt elk, Tule elk and Alshansk, Izubr, Siberian and Tian Shan marals:** The sum of (A) and (B) is the Total Score for the trophy. There are no nontypical categories.

**Weight:** Weigh the cleaned and boiled skull and antlers. Record whether the skull has been cut or not. (Supplemental)

**Reading the detailed online instructions in the RW Measurers Handbook is necessary**
