I certify that I hunted or acquired this trophy in an ethical, lawful, fair-chase manner, and according to Rowland Ward's Guiding Principles and I agree that all photos submitted will become the property of Rowland Ward and may be published and used for promotional purposes. The Rowland Ward Foundation reserves the right to exclude any trophy from publication. Incomplete or wrongly filled in forms will not be refunded.

Signature _____ Date _____ / _____ / _____ (Official Use Only _____ / _____)
 Year Month Day

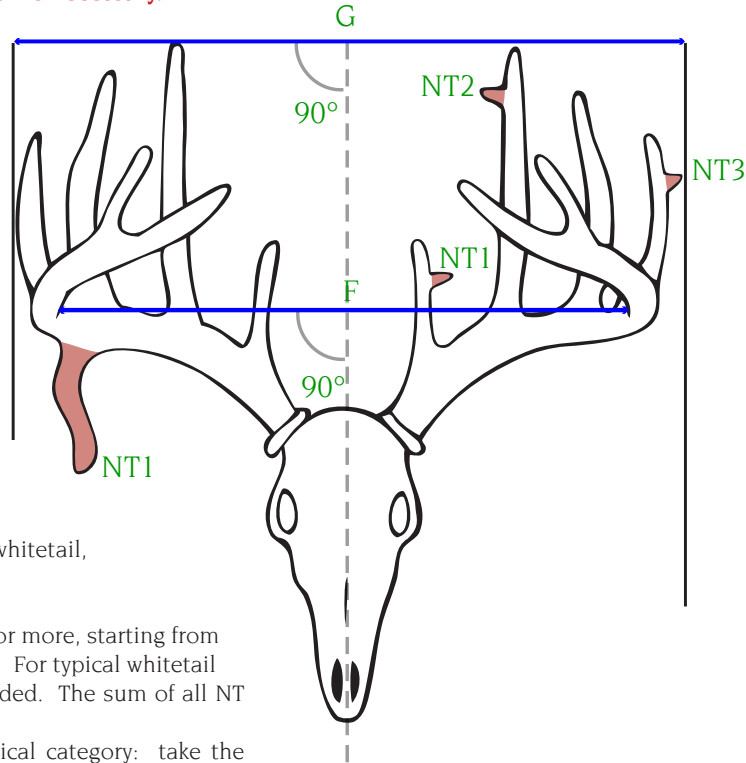

Reading the detailed, online instructions in the RW Measurers Handbook is necessary.

L=Length: Measure the main antler on the center of the outside curve from the lowest edge of the burr to the tip. **(L)** The tape must not be pressed into the groove above the burr. The main antler is that part of the antler that curves forward and is closest to the skull. The main antler is that part of the antler that curves forward and is closest to the skull.

C=Circumference: Measure the smallest circumference between the burr and 1st tine (eye guard) **(C1)**, the 1st and 2nd tines **(C2)**, the 2nd and 3rd tines **(C3)**, and 3rd and 4th tines **(C4)**. Circumferences may only be measured between typical tines. (Instructions on what to do if tines are missing in RW Handbook.)

T=Tines: All tines must be inch or more, draw a base line for each. Measure from the point to the base, start with **(T1)**, eye guard, and continue along the main antler to the tip. **(T2, T3, T4, etc.)** (It is very rare for there to be more than 7 typical tines per side.)

F=Inside Span: Measure the widest distance between the main antlers (not any tines) at a 90-degree angle to the length of the skull. **(F)**

The sum of the above is the Typical Score **(A)** on Method form) for a typical whitetail, but any nontypical tines must be recorded, see below.

NT=Nontypical Tines: Measure the length of all nontypical tines of 1 inch or more, starting from the burr and working up along the main antler. **(NT1, NT2, NT3, etc.)** For typical whitetail trophies they do not count toward the score, but these must be recorded. The sum of all NT tines is placed in **(B)** on the Method form.

Typical or Nontypical? To determine if a white tail falls in the nontypical category: take the nontypical sum **(B)** and if it is 3% or more of the typical score **(A)** the trophy will be placed in the non-typical category.

Count the number of valid typical tines and the main antler ends.

Count the number of valid nontypical tines, NOT including the main antler ends.

G= Spread: Measure the widest outside spread at a right angle to the long axis of the skull.

Comments (Note trophy repairs, remeasuring, different shipping address, and so on, here):

If you want your certificate, book or plaque shipped to a different address enter in the comment section above.

Photos: Digital clear, focused side- and front-view in-the-field photos must accompany all animals. Image must be a minimum of 300DPI (12 dots per mm) or 2100 x 1500 pixels.

Send this form and payment to the address below, or email to info@rowlandward.org.

Payments are accepted via credit card or checks drawn on a U.S. bank.

Total your order here:

	Quantity	Subtotal
1. Non-refundable processing fee for each record book entry (No certificate or plaque w/o entry).. \$35 US Qty. <u> 1 </u>		<u> \$35 </u>
