

Method 1-f

Deer with 3x3 or 4x4 Frames: Axis or Chital, Bawean, Calamian, Manchurian roe, Hog, Rusa, Sambar, Sika, Siberian roe, and Visayan.

- ☐ Axis
- ☐ Hog
- ☐ Roe, Manchurian
- ☐ Roe, Siberian
- ☐ Rusa
- ☐ Sambar, Ceylonese
- ☐ Sambar, Formosan
- ☐ Sambar, Indian
- ☐ Sambar, Indochinese
- ☐ Sambar, Philippine
- ☐ Sambar, South China
- ☐ Sika, Chinese
- ☐ Sika, Japanese
- ☐ Sika, Manchurian
- ☐ Sika, Northern Japanese
- ☐ Axis (introduced)
- ☐ Hog (introduced)
- ☐ Rusa (introduced)
- ☐ Sambar (introduced)
- ☐ Sika (introduced)
- ☐ Other _____

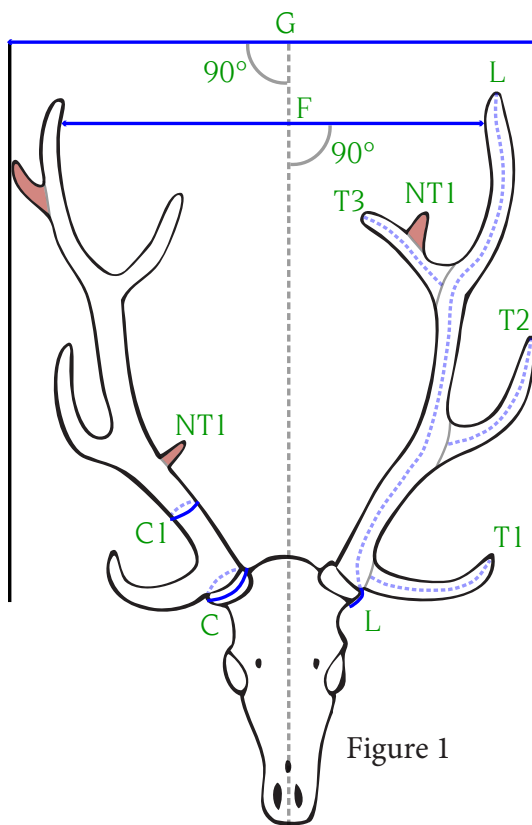

Figure 1

Typical Tines	Left	Right
L (Length Main Antler)	- /8	- /8
C (Circumference)	- /8	- /8
C1	- /8	- /8
T1 (Length)	- /8	- /8
T2	- /8	- /8
T3 Sika deer only	- /8	- /8
F (inside span)	- /8	
Span Credit (no more than longest main antler)		- /8
Total Typical Score	A	- /8
Count No of Typical Tines		
Non-typical Tines		
NT1 (Length NT tine)	- /8	- /8
NT2	- /8	- /8
NT3	- /8	- /8
NT4	- /8	- /8
NT5	- /8	- /8
NT6	- /8	- /8
Total All Non-Typical Tines	B	- /8
Percent NT Tines		%
Count No of Non-typical Tines		
Supplemental		
G (Outside Spread)		- /8
Siberian & Manchurian roe deer: if B is 3% or more of A trophy falls in Non-typical table.

Method 1-f

Deer with 3x3 or 4x4 Frames: Axis or Chital, Bawean, Calamian, Manchurian roe, Hog, Rusa, Sambar, Sika, Siberian roe, and Visayan.

Length: Measure the main antlers on the center of the outside curve from the lowest edge of the burr to the tip. (L) The tape must not be pressed into the groove above the burr, see figure 2.

Circumference: Measure circumference at the burr. (C) Measure the smallest point (C1) between the brow and bez (T1 and T2). Measurement must be taken between typical tines, see figure 1.

Typical Tines: Measure the length of all typical tines of 1 inch or more. (T1, T2) and T3 for sika only. Mark off all tines with a base line. Measure from the point of the tine to the center of the base line. All deer for this method have 3 typical points per side with the exception of a sika, which can have a 3x4, 4x3 and 4x4 as a typical frame. Measure only typical tines on a 3x3 or 4x4 frame, non-typical tines see below.

Span: Measure the widest distance (F) between the main antlers (not any tines) at a right angle to the long axis of the skull. For hog and roe deer the two highest points are the main beams, for rusa deer the two highest inside points are the main antlers. For sambar, axis and sika the two most outside typical points are the main antlers, see figure 1. **Note that the span credit can be no more than the length of the longest main antler.**

Typical Score is the sum of the above. Any non-typical tines must be recorded. See below.

Count the number of typical tines.

Nontypical Tines: Measure the length all nontypical tines of 1 inch or more. Measure from the point of the tine to the center of the base line. (NT1, NT2, NT3, etc.) Non-typical tines do not count towards the total score (except for Siberian & Manchurian roe), for the others they are supplemental information. This measurement is required for all deer under Method 1-f..

Nontypical Tines for Siberian and Chinese roe: For these roe deer if the total non-typical score (B) is 3% or more than the typical score (A) the head falls in the NT category.

Count the number of non-typical tines.

Spread: Measure from the farthest tine or main beam on the left side to the farthest tine or main beam (G) on the right side and measure at an exact 90-degree angle to the center line of the skull. Do not measure any NT tines that protrude on the outside of a rack that would increase the spread value, see figure 2. **This is a supplemental measurement but required.**

Reading the detailed-online instructions in the RW Measurers Handbook is necessary.

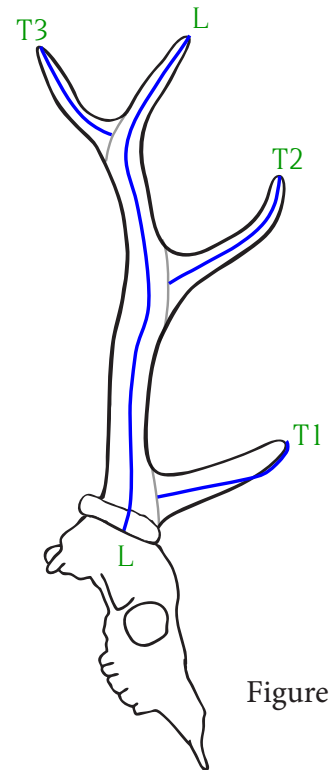

Figure 2

Comments (Note trophy repairs, remeasuring, different shipping address, and so on, here):

If you want your certificate, book or plaque shipped to a different address enter in the comment section above.

Photos: Digital clear, focused side- and front-view in-the-field photos must accompany all animals. Image must be a minimum of 300DPI (12 dots per mm) or 2100 x 1500 pixels.

Send this form and payment to the address below, or email to info@rowlandward.org.

Payments are accepted via credit card or checks drawn on a U.S. bank.

Total your order here:

	Quantity	Subtotal
1. Non-refundable processing fee for each record book entry (No certificate or plaque w/o entry).. \$35 US Qty. <u> 1 </u>		<u> \$35 </u>
2. Rowland Ward digital certificate of publication.....	\$10 US Qty. <u> </u>	<u> </u>
