Method 1-j Muntjac, Brocket and Pudu Deer

N.B. Unlike most other deer species, these animals are measured to the nearest 1/16 of an inch (1.3 cm).

Length: Measure the main antler on the center of the outside curve from the lowest edge of the burr to the tip. **(L)** The tape must not be pressed into the groove above the burr.

Circumference: Measure the circumference of the burr. **(C)**

Typical Tines: All deer for this method have 1 typical point per side (the main antler) with the exception of the muntjac. Only tines or points that are found on a typical 1x1 or 2x2 frame of the species may be measured as typical tines/points. A tine is at least 0.5 inch (1.3cm) and no wider at its base than it is long.

Muntjac only (2x2 typical frame): measure the two brow tines or eye guards. A tine must be at least 0.5 inch (1.3 cm) in length to be measured and no wider at its base than it is long.

Total score: is the sum of the above measurements. The measurements below are not part of the score but must be recorded.

Non-typical Tines: Measure the length of all nontypical tines of at least 0.5 inch (1.2 cm). Measure from the point to the base line.

Inside Span: Measure the widest distance between the main beams at a right angle to the long axis of the skull. **(F)**

Count the number of typical points including the main antler.

Count the number of valid non-typical points including the main antler.

Comments (Note trophy repairs, remeasuring, different shipping address, and so on, here):

If you want your certificate, book or plaque shipped to a different address enter in the comment section above.

Photos: Digital clear, focused side- and front-view in-the-field photos must accompany all animals. Image must be a minimum of 300DPI (12 dots per mm) or 2100 x 1500 pixels.

Send this form and payment to the address below, or email to info@rowlandward.org.

Payments are accepted via credit card or checks drawn on a U.S. bank.
