Method 15 Markhor

Length: Measure each horn around the spiral by keeping the tape on top of the spiral ridge. Start at the lowest point at the back of the horns at the base and proceed to the tip. If the spiral ridge ends near the tip, proceed in a straight line to the tip and do not continue to spiral. Many markhors have a front and a rear ridge but the rear always yields the greater length and is better defined so it should be used. **(L)** (The Chilton wild goat, sometimes wrongly referred to as a markhor, must be measured under 7-b.)

Circumference: Measure the base of each horn. **(C)** The tape must form a continuous loop and be at a 90-degree angle to axis to the horn. Do not press the tape in any grooves and do not follow the jagged edge of the horn base.

Tip to Tip: Measure the Tip to Tip spread from the center of one horn tip to the other. **(E)** REQUIRED

Growth Rings: Count the rings on both horns. (Supplemental)

Comments (Note trophy repairs, remeasuring, different shipping address, and so on, here):

If you want your certificate, book or plaque shipped to a different address enter in the comment section above.

Photos: Digital clear, focused side- and front-view in-the-field photos must accompany all animals. Image must be a minimum of 300DPI (12 dots per mm) or 2100 x 1500 pixels.

Send this form and payment to the address below, or email to **info@rowlandward.org**.

Payments are accepted via credit card or checks drawn on a U.S. bank.
